PROFILE

I'm a full-stack developer who enjoys building efficient, scalable web applications. I love working with TypeScript for front-end and tools like React and Next.js, while also handling the back-end side with Node.js, Express, and databases like MongoDB and PostgreSQL. I've also got experience deploying on AWS and Cloudflare. My focus is on creating responsive, high-performance applications that don't just look good but work flawlessly.

EDUCATION

Shri Ramswaroop Memorial University

Bachelor of Computer Applications

Lucknow, UP

Sep. 2022 – Sep. 2025

Red Rose Senior Secondary School

Intermediate – PCM – 88.6%

Lucknow, UP

April 2021

Red Rose Senior Secondary School

High School – 89.1%

April 2019

PROJECTS

CipherShare / *Next.js, TypeScript, PostgreSQL, AWS EC2 & S3, NextAuth, TailwindCSS, Shadcn UI, Resend Email*

([Live Link](#) | [Github](#))

(May 2025)

- A secure file-sharing platform built with **end-to-end encryption** and **zero trust architecture**.
- Uses **hybrid encryption**: RSA-OAEP along with AES-GCM
- Enforces automatic file expiry via a scheduled **cron job** after 24 hours.
- The private key is encrypted using a user-defined passphrase, which is never stored.
- Implements NextAuth for authentication, including **email-based OTP** verification.
- **AWS EC2** for hosting and **AWS S3** for file storage.

VaultX / *TypeScript, React.js, TailwindCSS, PostgreSQL, Express.js, JWT, Resend Email, Material UI, RPCs*

([Live Link](#) | [Github](#))

(In Progress)

- A crypto payments platform that will support **Bitcoin**, **Ethereum** and **Solana** payments.
- Frontend is built using React.js and TailwindCSS.
- Google OAuth and **email-based OTP** authentication.
- Hosted on **AWS EC2**.
- Authentication is done through JWT and OAUTH, passwords are hashed before being stored in database.

TECHNICAL SKILLS

Languages: TypeScript, Java

Frameworks: Next.js, Node.js, TailwindCSS,

Developer Tools: Amazon Web Services, Docker, Git.
